Module 1g: Index

Objective:
To understand the importance of index on DB performance and how to take advantage of it.

Topics:
  - For what operations indexes are beneficial.
  - What are the limitations of indexes.
  - How to create/remove/modify index
  - What is the criteria for deciding to build index on a column

Task:
Understand the functionality of index and its merits/limitations. Also, familiarize with index creation/removal/modification in xampp environment.

Assessment:
This knowledge will be tested in quizzes.
