

Module 1h: Stored Procedures

Objective:

To understand the significance of stored procedures in commercial environment and the merits of this experience in job placement.

Topics:

- importance of stored procedure for improved execution performance
- create/remove/modify stored procedure

Task:

Create (and then alter) a stored procedure (as well as a stored function) with more than one parameter in xampp environment in any one of the sample databases. Also, test the stored procedure using all three execution modes.

Assessment:

This knowledge will be tested in quizzes.
