Dear Mark

Thank you for letting me know. I consulted with our Curriculum Committee. Although there are many overlaps between the two courses, your new course emphasizes topics specific for computer science, which are not covered in MAD 2104.

The Math & Stat Department does not have objections to your new course proposal and I wish you and your students success.

Hamid

P.S. For Spring 2017, we have scheduled two sections of MAD 1100 and two of MAD 2104. Please let me know if you are planning to offer COT 3100 this coming spring so that we can cancel some sections of MAD.

Subject: Discrete Structures New Course Proposal

Dear Hamid,

Following up from last spring, we are preparing to submit the Discrete Structures course for Bulletin #1, approved by our faculty. I would appreciate a quick email from you as chair of Math/Stat indicating that you have no objections, so we can timely submit to our college committee.

The syllabus remains at:

https://users.cs.fiu.edu/~weiss/discrete/COT_3100.docx

Our majors would be allowed to choose between the new COT-3100 and the existing MAD courses.

Best regards,

Mark
