Subject: Prog I Common Course Objectives

Hi Erica,

You can't always take what students say to be totally accurate, but I had 3 students in Prog II tell me that their Prog I prof did not teach ArrayLists at all and taught arrays instead. (This is where we came in)

The Prog I CCO's state "Master the ArrayList and String Classes" but only "Be exposed to arrays."

Some profs may have come aboard after the revision last Spring, so it might be helpful to send them out to all. In the interest of continuity.

Thanks,
Greg
