

COP-4610 Operating Systems Principles

Course Change Justification

During the curriculum restructuring process, two architecture specific required courses (CDA-3103 and CDA-4101) are identified with substantial overlap with other Computer Science required courses. For this reason, these two courses have been replaced with one new course (CDA-3102) effective from Spring 2020. This would allow students with one additional elective course to widen their skills in emerging technologies that would increase their career opportunities.

From Spring 2020, we will still offer CDA-4101 for students admitted prior to 2020 and have students enroll in either CDA-4101 or CDA-3102. Hence, this course change proposes to replace the current prerequisite “COP-4338 and CDA-3102” with “COP-4388 and (CDA-3102 or CDA-4101)”, which is essential to permit both streams of students to enroll in COP-4610.
