

**FLORIDA INTERNATIONAL UNIVERSITY  
UNIVERSITY CURRICULUM COMMITTEE**  
*Proposal for a Course Change*

**DO NOT TYPE IN THIS BOX**

Bulletin #: 2  
Academic Year: 2019-20

**PART I. FILL OUT THIS SECTION COMPLETELY**

1. School/College Engineering and Computing  
Div./Dept. in Which Taught School of Computing and Information Sciences
2. 

<u>CNT</u>	<u>4</u>	<u>403</u>		<u>3</u>
Alpha Prefix	1st Digit	Last 3 Digits	"C"-lec-lab "L"-Lab	Cr. Hrs.
3. Present Course Title Computing and Network Security

**PART II. FILL OUT CHANGE INFORMATION ONLY**

Change Effective 8/5/2019 to 1/20/20

- 4a. New Course Title \_\_\_\_\_
- b. New Abbreviated course Title (for computer class schedules, transcripts) \_\_\_\_\_  
LIMITED TO 25 Characters (including spaces)

- 5a. 

<u>        </u>	<u>        </u>	<u>        </u>	<u>        </u>
New Alpha Prefix	New 1st Digit	New Last 3 Digits	Change "C"-lec-lab "L"-Lab
- 5b. Change Credit Hours: From \_\_\_\_\_ To \_\_\_\_\_

6. New Catalog Description/Major Topics (not to exceed 200 characters including spaces)  
*College of Medicine and College of Law: Attach description not exceeding 1,000 characters including spaces.*

7. New Prerequisite(s): (COP-3804 or COP-3337 or COP-2270) and CGS-3767
8. New Corequisite(s): CGS-4285
9. Explain Reclassification Request:

SCIS is adding a new BS-in-Cybersecurity program that requires COP-2270. Hence this proposal is to include COP-2270 in the prerequisite list and CGS-4285 as a coreq to reduce prereq chain length.

10. Does this proposed change impact the assessment process of a program or certificate? **If yes, then send notification to [assessment@fiu.edu](mailto:assessment@fiu.edu).**

**PROPOSAL REQUESTED BY:**

	(Email address)	(Phone number)	
Chairperson (Dept./Div.)	<u>S.S. Iyengar</u>		<u>10/24/2019</u>
	(Type name)	(Signature)	
Chairperson (Curr. Comm.)	<u>Wei-Chiang Lin</u>		<u>10/31/2019</u>
	(Type name)	(Signature)	
College/School Dean	<u>John Volakis</u>		<u>11/5/2019</u>
	(Type name)	(Signature)	

Submit one original form. Attach one copy of the Course Justification and Course Syllabus: Course Description, Objectives, Learning Outcomes, Major Topics and textbooks.

## **CNT-4403 Computing and Network Security**

### **Course Change Justification**

SCIS is adding a new BS-in-Cybersecurity program that requires C programming knowledge. For this reason, the revised COP-2270 (Secure Programming in C for Engineers) will be a required course for this program.

Since CNT-4403 is also a required course for this program, and C programming will prepare students well for CNT-4403, we propose to change the prerequisite for CNT-4403 by including COP-2270 in the prerequisite list. Furthermore, with CGS-4285 (Applied Computer Networking) as a corequisite, the prerequisite chain length will be reduced that will improve the graduation rate.

## School of Computing and Information Sciences

**Course Title:** Computing and Network Security

**Date:** 9 29 19

**Course Number:** CNT 4403

**Number of Credits:** 3

---

**Subject Area:** Security

**Subject Area Coordinator:**

Nagarajan Prabakar

**email:** prabakar@cs.fiu.edu

---

**Catalog Description:**

Fundamental concepts and principles of computing and network security, symmetric and asymmetric cryptography, hash functions, authentication, firewalls and intrusion detection, and operational issues.

---

**Textbook:** "Principles of Computer Security: Security – and Beyond"

by Wm. Arthur Conklin, et al.

McGraw Hill Higher Education (ISBN: 0072255099)

---

**References:** "Introduction to Computer Security"

by Matt Bishop

Addison Wesley (ISBN: 0321247442)

---

**Prerequisites Courses:** (COP 3804 or COP 3337 or COP 2270) and CGS 3767

---

**Corequisites Courses:** CGS 4285

---

Type: Required

Prerequisites Topics:

- Java programming
- Fundamental concepts of operating systems
- Shell scripting
- Basic network concepts, including TCP/IP

Course Outcomes:

1. Be familiar with basic concepts in information security
2. Master the concepts related to applied cryptography, including symmetric cryptography and asymmetric cryptography
3. Be familiar with public key infrastructure
4. Master the theory and common types of access control
5. Master the key factors involved in authentication
6. Be familiar with runtime communication techniques such as intrusion detection systems
7. Be familiar with policy and operational issues in security
8. Be exposed to vulnerabilities, attacks, auditing, and forensics
