- Change Credit Hours: From 3 To 2

- New Catalog Description/Major Topics (not to exceed 200 characters including spaces)
College of Medicine and College of Law: Attach description not exceeding 1,000 characters including spaces.

- New Prerequisite(s): CIS 3XXX (Capstone I) and Senior standing
- New Corequisite(s): None

- Explain Reclassification Request:

Changing from 3 to 2 credits, allows to change Senior Project into a two course sequence (1-credit CIS-4XXX Capstone I and 2-credit CIS-4911 Capstone II). This will improve graduation rate

10. Does this proposed change impact the assessment process of a program or certificate? If yes, then send notification to assessment@fiu.edu.

CIS-4911 Capstone II

Course Change Justification

Currently, CS majors take the senior project in their last term. Since completing the senior project in one term demands a significant amount of time, students are unable to take other classes in the last term. To balance the course load and to improve the graduation rate, it is necessary to complete the senior project in two terms with a 1-credit “Capstone I” followed by a 2-credits “Capstone II”.

This course change of CIS 4911, allows to change the title to “Capstone II” with the number of credits as “2”. Also, the new prerequisite “CIS 3XXX (Capstone I) and Junior standing” will ensure students have completed the first part of the senior project (called Capstone I) and most of the required courses.

Changing from 3 to 2 credits, allows to change Senior Project into a two course sequence (1-credit CIS-3XXX “Capstone I” and 2-credit CIS-4911 “Capstone II”). This will allow students to complete capstone in two terms and will improve the graduation rate.

Students who are admitted before Fall 2020 are also strongly encouraged to take Capstone I and II, but to accommodate them, they are allowed to fulfill the capstone requirement by completing IDS-4918 (“Vertically Integrated Projects – C” 3-credits) in one term.

School of Computing and Information Sciences

Course Title: Capstone II

Date: 11/22/19

Course Number: CIS 4911

Number of Credits: 2

Subject Area: Knowledge focus groups covered in the curriculum of the BS in Computer Science.	Subject Area Coordinator: Monique Ross email: moross@fiu.edu
Catalog Description: Students work on faculty supervised projects in teams of up to 5 members to design and implement solutions to problems utilizing knowledge obtained across the spectrum of Computer Science courses.	
Textbook: No text book required	
References:	
Prerequisites Courses: CIS 3XXX (Capstone I) and Senior standing.	
Corequisites Courses: None	

Type: Required

Prerequisites Topics:

- Software development process
- Basic project management concepts
- Domain specific knowledge (for project being developed)

Course Outcomes:

1. Mastery of problem formulation.
2. Demonstrate mastery of specifying the requirements of a problem.
3. Demonstrate mastery of designing the solution to a problem.
4. Demonstrate mastery of realizing the solution to a problem.
5. Demonstrate the ability to validate and evaluate the solution to a problem.
6. Demonstrate the ability to manage a semester long project.
7. Demonstrate the ability to work effectively in a project team.
8. Demonstrate the ability to think logically and critically when developing the solution to a given problem.
9. Demonstrate the ability to apply concepts learned in various courses when developing the solution to a given problem.
10. Demonstrate the ability to communicate the details of the technical solution through verbal and written modes.
11. Demonstrate the ability to incorporate ethical issues into the project development and documentation process.

Relationship between Course Outcomes and Program Outcomes

BS in CS: Program Outcomes	Course Outcomes
a) Demonstrate proficiency in the foundation areas of Computer Science including mathematics, discrete structures, logic and the theory of algorithms	1, 2, 3, 4, 5, 9
b) Demonstrate proficiency in various areas of Computer Science including data structures and algorithms, concepts of programming languages and computer systems.	1, 2, 3, 4, 5, 8, 9
c) Demonstrate proficiency in problem solving and application of software engineering techniques	1, 2, 3, 4, 5, 6, 7, 8, 9
d) Demonstrate mastery of at least one modern programming language and proficiency in at least one other.	4, 9
e) Demonstrate understanding of the social and ethical concerns of the practicing computer scientist.	11, 9
f) Demonstrate the ability to work cooperatively in teams.	7
g) Demonstrate effective communication skills.	10, 9

Assessment Plan for the Course and how Data in the Course are used to assess Program Outcomes

Student and Instructor Course Outcome Surveys are administered at the conclusion of each offering, and are evaluated as described in the School's Assessment Plan:
