

**Justification for the prerequisite change of  
CNT 4403 Computing and Network Security**

CNT4403 does not require second level programming knowledge.

Hence, changing the prerequisite from "(COP3804 or COP3307 or COP2270) and CGS3767" to "CGS3767" will allow students to enroll in CNT4403 early and expedite their minor completion.

Please note that the corequisite remains unchanged (CGS4285).
