

Instructions

This Course Change form will enable you to propose several types of changes to existing courses. You may propose changes regarding:

- Department offering the course
- Course prefix
- Course number
- Course title (you may propose changes both to the full course title and/or to the abbreviated title)
- Course description
- Global Learning designation
- Gordon Rule designation
- University Core Curriculum designation
- Grading method (changing from a graded option to a pass/fail option, or vice versa)
- Credit Hours
- Course prerequisites and corequisites (adding or removing)

The Course Review Subcommittee, a standing committee of the University Curriculum Committee, will review these proposed changes and recommend approval of these changes to the FIU Faculty Senate. The members that comprise these governing bodies may not understand the nuances of your department or academic discipline. Therefore, you will be required to provide a justification for the changes you are proposing. The Course Review Subcommittee requests that justifications be specific and written for an audience that is unfamiliar with your department and program. You will also be required to attach a syllabus showing your proposed changes. Requires criteria for the syllabus are provided at the end of this form.

Proposed Changes

Using the drop-down list, select each type of change you are proposing. (You may propose more than one type of change using this Course Change form.)

Course Prerequisites/ Corequisites

Justification for Course Change

Please provide a justification for the changes you are proposing.

The proposed prerequisite modification for this course is part of ongoing adjustments to align existing department offerings with the newly introduced Bachelor of Science in Data Science and AI program. This change ensures that students enrolled in the new degree can seamlessly access relevant courses within the department, maintaining the academic rigor of the program while accommodating their specific curriculum structure.

This adjustment has been thoroughly reviewed and approved by all professors involved and the KFSCIS Undergraduate Program Curriculum Committee, reflecting a collaborative consensus to address housekeeping needs and streamline the integration of the new degree with the existing course offerings.

Course Information

College

CENGR - College of Engineering
& Comp

Department(s)

Knight Foundation School of
Comptg & Info Sciences

If proposing a change in the department offering the course: Remove the populated department by selecting the "X" next to its name. Then, begin typing the name of the new department; a list of possible departments should autopopulate. Select the new department from this list.

Career

Undergraduate

Course Prefix

COP

If proposing a change in course prefix: Begin typing the new course prefix; a list of possible prefixes should autopopulate in the drop-down list. Select the new course prefix from this list.

Course Number

2047

If proposing a change in course number: Begin by deleting the autopopulated course number. Then, type the new course number you would like to propose.

Abbreviated Course Title

Python Programming I

Long Course Title

Python Programming I

Long Description (Catalog Description)

Introduction to computer programming using Python including fundamental concepts and systematic design techniques. Students will write programs that computationally solve and reduce problems.

Prerequisite: MAC 1140 or MAC 1147 or MAC 2233 or MAC 2311 or Advisor's permission

Should this be designated a Global Learning course?

No

Should this be designated a Gordon Rule Writing course?

No

Should this be designated a University Core Curriculum course?

No

Does this proposed change impact the assessment process of a program or certificate?

No
