

This Program Change form will enable you to propose several types of changes to any existing program. You may propose changes to an existing program's:

- Title
- Description
- Requirements
 - Admission Requirements
 - Prerequisites
 - Required courses
 - Elective courses
 - Graduation requirements

In addition, this program change form should be used to propose a new major or track (or specialization, concentration, area of emphasis). Each of these types of programs is defined by the Board of Governors (BOG) of the State University System of Florida, in its Regulation 8.011 Academic Degree Program Coordination and Approval. These definitions are outlined in FIU Policy 350.010 Academic Degree Program Coordination and Approval.

- **Program Major:** An organized curriculum offered as part or all of an existing or proposed degree program. A major must be reasonably associated with the degree program under which it is offered and share a minimum of 15% of core courses with other majors within the same degree program. For an undergraduate degree, each major requires completion of a minimum of 30 credits (including core courses). Graduate degrees typically focus only on the specific discipline; therefore, there is no minimum credit requirement for graduate majors. There are cases where the major and degree program names are identical, thus creating only one major.
- **Program Track (or Specialization, Concentration, Area of Emphasis):** An organized curriculum, offered as part of an individual student's degree program, which enhances or complements the degree to be awarded in a manner that leads to specific educational or occupational goals. In order to establish some uniformity across degree programs, this level of categorization should be termed a track unless a different terminology is required for accreditation or discipline purposes. The number of credit hours of a track, specialization, concentration, or area of emphasis shall not equal or exceed the number of credit hours established for a program major at the same degree level.

Standing committees of the FIU Faculty Senate will review these changes. The members that comprise these governing bodies may not understand the nuances of your department or academic discipline. Therefore, you will be required to provide a justification for the changes you are proposing. The

committees request that justifications be specific and written for an audience that is unfamiliar with your department and program.

Program & Proposal Type

Which type of program do you propose changing?

Degree Program

Select each type of change you are proposing to an existing program. (You may propose more than one type of change/ addition.)

Description, Program Requirements, Major Requirements

Justification

Please provide a justification for the changes you are proposing.

Justification for Changes to the B.S. in Information Technology Program

The current Information Technology program has two majors: the initial traditional IT Major and the Software Major. The proposed changes enhance the Software Major and modify the traditional IT Major to DevOps Major to address the current trends in the industry. The changed majors are designed to prepare our students with the skills that make them highly desirable to employers in both the software development field for our Software Major and in DevOps Major, which is the current operational trend in the IT industry.

The Information Technology environment is rapidly evolving in hardware and software as well as methodologies and specializations. There are two major areas of focus that are addressed in the proposed changes: Cloud Computing and Continuous Integration/Continuous Delivery (CI/CD).

Cloud Computing: Today's software environment is focused on cloud-based applications. Developing and deploying applications to a web-based distributed environment requires new skill sets in programming, security, and operational activities. New courses in this major track address the architectural concepts of creating and sustaining cloud-based applications.

CI/CD: The concept of Continuous Improvement/Continuous Delivery (CI/CD) integrates systems administration and security specialists with the design and development teams at the earliest stages and throughout the process of new software creation and enhanced features, resulting in faster updates, increased productivity, and improved security. CI/CD enforces the use of automation in building, testing, and deploying applications.

Effective term

Proposed program changes will become **effective the next academic year**.

For example: changes submitted in 2024-25 will become effective in 2025-26.

Questions Specific to the List of Courses Required for this Program

If proposing additional courses, do all courses exist in the current catalog?

No

If courses are not in the current catalog, are they currently in the workflow process?

Yes

New Course Form

Please submit a New Course Form for the courses you wish to propose.

Are all courses to be added taught in the same proposing department?

Yes

Are courses to be deleted taught in the same proposing department?

Not applicable. This proposal does not include the deletion of any courses.

If no, provide written approval/acknowledgment of the other department(s).

-

Does this change affect the courses measuring Student Learning Outcomes (SLOs) or Program Outcomes (POs) for the program?

No

Please upload your revised Student Learning Outcomes (SLOs) and/or Program Outcomes (POs).

-

Current Program Description

The Bachelor of Science (BS) in Information Technology prepares graduates to excel in a world increasingly focused on information technology. Students have the opportunity to advance their knowledge and earn one of the most in-demand bachelor's degrees with a curriculum that includes courses in programming, software development, information systems, database development, computer networking, operating systems, and more. Students learn from top-ranked faculty and industry experts. The BS in Information Technology includes hands-on skill development, focusing on becoming proficient in new, innovative technologies. Students will build technical abilities, be prepared for real-life situations, and be able to apply their extensive knowledge of computers, programming, and all IT-related tasks to the professional world—from business to government to education to non-profit organizations. The Board of Governors of the State University System of Florida has recognized FIU as a top institution for training tech talent for its innovative approaches in educating the next generation of top computing specialists. Many of our information technology graduates have excelled in positions that include systems administrators, applications support specialists, database administrators, computer programmers, computer analysts, and computer support specialists. Businesses and organizations in every industry rely on computers and networks to create opportunities and solve challenges. With your BS in Information Technology, students will be prepared to be an information technology specialist in any type and size of organization in a rapidly expanding job market.

For more information, visit the College of Engineering and Computing website.

Proposed Program Description

The Bachelor of Science (BS) in Information Technology prepares graduates to excel in a world increasingly focused on information technology. Students have the opportunity to advance their knowledge and earn one of the most in-demand bachelor's degrees with a curriculum that includes courses in software and database development, cloud computing, application deployment and management, and more. Students learn from top-ranked faculty and industry experts. The BS in Information Technology includes hands-on skill development, focusing on becoming proficient in new, innovative technologies and methodologies. Students will build technical abilities, be prepared for real-life situations, and be able to apply their extensive knowledge of industry computing techniques in the professional world—from business to government to education to non-profit organizations. The Board of Governors of the State University System of Florida has recognized FIU as a top institution for training tech talent for its innovative approaches in educating the next generation of top computing specialists. Our information technology graduates are prepared for positions that include specialties in all aspects of cloud computing, DevOps, application and database development. With a BS in Information Technology, students will be prepared to be information technology and development specialists in any type and size of organization in a rapidly changing worldwide technical environment. For more information, visit the College of Engineering and Computing website.

Admissions Requirements

Admissions Requirements for the Bachelor of Science (BS) in Information Technology

See general university admissions requirements at admissions.fiu.edu.

Admissions Requirements for the Combined BS in Information Technology to Master of Science (MS) in Engineering Management Accelerated Degree Pathway

Students who pursue a BS degree and are approaching their first semester of the senior year in Information Technology and have earned at least a 3.2 overall GPA may, upon recommendation from three faculty members, apply to the department to enroll in the combined BSIT/MSEM pathway. Students must also submit an online application to the University Graduate School for admission to the MSEM program. In addition to the admission requirements of the MSEM program, students must meet all the admission requirements of the University Graduate School. Students need only apply once to the combined degree pathway the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program.

Students interested in the combined pathway should consult with their undergraduate advisor on their eligibility to the pathway, preferably during their junior year, since appropriate planning of coursework is required in order to achieve the full nine-credit benefit. The student should also meet the MSEM Program Director to learn about the graduate program and available tracks/courses before completing the application form and submitting it to their undergraduate advisor. Final decision for admission to the MSEM program will be made by the University Graduate School upon recommendation by the Engineering Management program director. Applicants will be notified by the Engineering Management Program and the University Graduate School of the decision on their applications.

Program Requirements

Academic Progression Requirements

The B.S. in Information Technology degree as a first major requires completion of prerequisite courses and required and elective courses as outlined below. All required courses must be completed with a grade of "C" or better. All students must participate in KFSCIS assessment activities and successfully complete an exit interview prior to graduation.

Lower Division Preparation**Type****Prerequisite****Common Prerequisite Courses**

For a list of all state-approved common prerequisites, including alternatives, visit <https://cpm.flvc.org>.

Consult FIU Catalog for double majors coupled with IT Programs. Students would need to take the prerequisites for the other major they select, in addition to the IT prerequisites.

All students must have completed the following courses (or equivalent) prior to starting the Information Technology program.

Complete ALL of the following Courses:

- CGS1920 - Introduction to the Field of Computing
OR COP1000 - Introduction to Computer Programming
OR IDC1000 - Computer Science for Everyone
- CGS2060 - Introduction to Microcomputers
OR CGS2100 - Intro to Microcomputer Applications for Business
OR CGS2518 - Computer Data Analysis
- MAC1140 - PreCalculus Algebra
OR MAC1147 - Pre-Calculus Algebra and Trigonometry
- PSY2012 - Introductory Psychology

-

IT Major-specific Prerequisites

-

Complete ALL of the following Courses:

- COP2250 - Java Programming
- COT3100 - Discrete Structures
OR MAD1100 - Mathematics for Information Technology

-

Software Major-specific Prerequisites

-

Complete ALL of the following Courses:

- COP2210 - Programming I
- COT3100 - Discrete Structures
OR MAD2104 - Discrete Mathematics

-

Additional Comments:

-

Upper Division Requirements

At least 50% of the upper division credits required for the BS in Information Technology must be taken at FIU.

Upper Division Preparation**Type**

Completion Requirement

Interdisciplinary Courses

Nine additional credits must be taken outside the Knight Foundation School of Computing and Information Sciences. These credits must normally be selected from the courses for a minor or certificate in another discipline. When there is no minor or certificate in the area of the student's interest, a set of courses can be created with the approval of advisers from KFSCIS and the other area of interest.

Earn at least 9 credits

-

Common Required Courses

-

Complete ALL of the following Courses:

- CEN3721 - Introduction to Human-Computer Interaction
- CGS3095 - Technology in the Global Arena
- CGS3767 - Computer Operating Systems
- CGS4285 - Applied Computer Network
- CGS4854 - Website Construction and Management
- CNT4403 - Computing and Network Security
- COP4703 - Information Storage and Retrieval Concepts

- COP4814 - Component-Based Software Development
- ENC3249 - Professional and Technical Writing for Computing
OR ENC3213 - Professional and Technical Writing
- CIS3950 - Capstone I
- CIS4951 - Capstone II

Information Technology Electives

Students in both majors must take information technology electives. Details for each major can be found below in the Major Requirements section. KFSCIS maintains two lists of courses for two elective groups: Application Development and System Network (<https://www.cis.fiu.edu/academics/degrees/undergraduate/>).

Free Electives for Both Majors

All students must complete six additional credits of general electives.

Earn at least 6 credits

Additional Comments:

Major Requirements

Information Technology (IT) Major: 12 Credits

Type

Completion Requirement

IT Major-specific Required Course

Complete ALL of the following Courses:

- COP3804 - Intermediate Java Programming

IT Major-specific Electives

Students must complete five elective courses, as follows. Select two courses from each group (four courses). Select the fifth course from either group:

<https://www.cis.fiu.edu/academics/degrees/undergraduate/>

-

Additional Comments:

-

Software Major: 12 Credits**Type****Completion Requirement****Software Major-specific Required Courses**

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements

Other Curricular Offering: Combined BS in Information Technology to MS in Engineering Management Accelerated Degree Pathway

A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the combined degree pathway could count up to three Management Electives toward their nine "interdisciplinary credits" in the BSIT degree program, for a total saving of 9 credit hours.

--ACG6026 Actg For Managers

--EIN5359 Ind Fin Decisions

--FIN6406 Corporate Finance

--MAN6167 Ldrshp Global Env

--MAN6209 Org Design & Behav

--QMB6616 Process & Oper Analysis

--ISM6021 Mgmt Information Systems

--MAR6805 Mkg Mgt In Glob Env

The combined BSIT/MSEM pathway has been designed to be a continuous enrollment pathway. During this combined BSIT/MSEM pathway, upon completion of all the requirements of the BSIT program, students will receive their BSIT degree. Students may elect to permanently leave the combined pathway and earn only the BSIT degree. Students who elect to leave the combined pathway and earn only the BS degree will have the same access requirements to regular graduate programs as any other student but will not be able to use the 9 credit hours in both the BSIT and MSEM degrees.

For each of the graduate courses counted as credits for both BSIT and MSEM degrees, a minimum grade of "B" is required. Only graduate courses with formal lecture can be counted for both degrees. The students are responsible for confirming the eligibility of each course with their undergraduate advisors.

Admission Requirements Changes

Instructions

To propose changes to existing catalog text, first select the "+ Add New" button below. A text box will appear. Then, copy the existing Admissions Requirements text from the Admissions Requirements section above and paste the text in the text box below.

In the text box, use your cursor to select (i.e., highlight) the text you want to change. Use the strikethrough icon to denote deletions of text and the underline icon to denote added text.

If there are any courses referenced as requirements for admissions, any additions should be added using the "Embed Course Link" (book icon) in the toolbar above. Click the icon. Then, search using the prefix and number of the course you wish to add. Then click "Embed Link".

If you are trying to add a course that has been deactivated, it must be reactivated before submission of this proposal.

Major Requirements

Instructions

This section allows you to make "changes to a current major" or propose a "new major".

To propose **changes** to the catalog information for an existing major(s):

1. Select "**Change(s) to a current major**" in the drop down below.
2. Use the "+ Add New" button and a text box will appear.
3. Copy the existing Major Requirements text from the Major Requirements section above and paste in the text box.
4. In the text box, use your cursor to select (i.e., highlight) the text you want to change. Use the strikethrough icon to denote deletions of text/courses and the underline icon to denote added text.
5. For additional courses, use the "Embed Course Link" (book icon) in the toolbar above. Click the icon. Then, search using the prefix and number of the course you wish to add. Then click "Embed Link".

If you are trying to add a course that has been deactivated, it must be reactivated before submission of this proposal.

6. Repeat steps 2 - 5 for each major which requires changes.

To propose a **new major(s)** in this degree program:

1. Select "**New major**" in the drop down below.
2. Use the "+ Add New" button.
3. Complete all the required fields.
4. In the Major Requirements field, provide a detailed course listing and any specifics regarding course requirements.
5. For each course, use the "Embed Course Link"(book icon) in the toolbar above. Click the icon. Then, search using the prefix and number of the course you wish to add. Then click "Embed Link".

If you are trying to add a course that has been deactivated, it must be reactivated before submission of this proposal.

6. Repeat steps 2 - 5 for each additional new major.

Using the drop down menu below, please select the changes you would like to make.

Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirement

Instructions

This section allows you to make "Change(s) to a current Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirement" or propose a "New Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering".

To propose **changes** to the catalog information for an existing Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering(s):

1. Select "**Change(s) to a current Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirement**" in the drop down below.

2. Use the "+ Add New" button and a text box will appear.
3. Copy the existing text from the Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirements section above and paste in the text box.
4. In the text box, use your cursor to select (i.e., highlight) the text you want to change. Use the strikethrough icon to denote deletions of text/courses and the underline icon to denote added text.
5. For additional courses, use the "Embed Course Link"(book icon) in the toolbar above. Click the icon. Then, search using the prefix and number of the course you wish to add. Then click "Embed Link".

If you are trying to add a course that has been deactivated, it must be reactivated before submission of this proposal.

6. Repeat steps 2 - 5 for each offering which requires changes.

To propose a **new Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering (s)** in this degree program:

1. Select "**New Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering**" in the drop down below.
2. Use the "+ Add New" button.
3. Complete all the required fields.
4. In the Requirements field, provide a detailed course listing and any specifics regarding course requirements.
5. For each course, use the "Embed Course Link" (book icon) in the toolbar above. Click the icon. Then, search using the prefix and number of the course you wish to add. Then click "Embed Link".

If you are trying to add a course that has been deactivated, it must be reactivated before submission of this proposal.

6. Repeat steps 2 - 5 for each additional new offering.

Using the drop down menu below, please choose the changes you would like to make.

-

Change(s) to a current Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering Requirement

-

New Track, Specialization, Concentration, Area of Emphasis, or Other Curricular Offering
